Aquatecnic Wetroom Shower Screens

A range of high quality shower screens and enclosures. Designed with wetrooms in mind, these screens are all 2000mm tall and manufactured using 8mm thick safety glass. The wall fixing profile is available in 4 standard colours: Chrome, Matt Black, Brushed Nickle and Brushed Brass. We have a range of bracing bars available in the same colours, to provide an ultra-modern co-ordinated look.

Wetroom Panel

Product	Chrome	Matt Black	Brushed Brass	Brushed Nickel	Actual Width (mm)	Adjustment (mm)
WP700	•	•	•	•	665	+/- 7.5
WP760	•	•	•	•	725	+/- 7.5
WP800	•	•	•	•	765	+/- 7.5
WP900	•	•	•	•	865	+/- 7.5
WP1000	•	•	•	•	965	+/- 7.5
WP1200	•	•	•	•	1165	+/- 7.5
Deflector Panel (includes fixed or pivoting corner fixing kit)						
300 Pivoting Return	•	•	•	•	343	N/A

Black Grid Wetroom Panel

We can also supply our shower panels with a Black Grid finish for a real Wow Factor. The grid is created using a matt black, glass filled paint which is applied to our shower screens in advance of the glass being tempered.

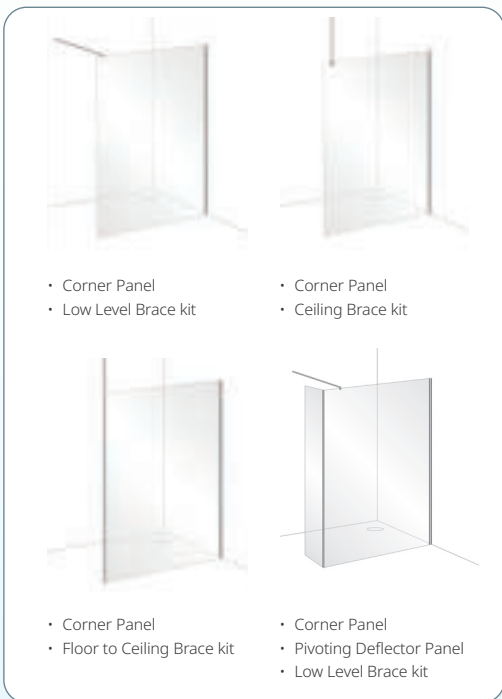

During this toughening process the paint is fused to the glass surface. With this production process you can be sure that your Black Grid screen will look great now, and for many years into the future.

Product	Description	Actual Size (mm)	Adjustment (mm)
BG800	Black Grid Wetroom Panel	765	+/- 7.5MM
BG900	Black Grid Wetroom Panel	865	+/- 7.5MM
BG1000	Black Grid Wetroom Panel	965	+/- 7.5MM
BG1100	Black Grid Wetroom Panel	1065	+/- 7.5MM
BG1200	Black Grid Wetroom Panel	1165	+/- 7.5MM
BG300 PR	Pivoting Deflector Panel	343	N/A

● When you need a more complex enclosure | We're here to help

Koster Aquatecnic can design shower enclosures to suit virtually any installation. We can supply 2 screen or 3 screen enclosures: with no door, sliding doors or pivot doors. Just contact us with details of what you need and we will supply you with a bespoke quotation. (See back page)

Bracing Options

All of our shower screens are made from toughened 8mm glass and are incredibly strong. However, we always recommend bracing bars to provide added support and rigidity, particularly on larger screens. As standard we supply square profile bracing kits, but if you would prefer a traditional round profile then please contact us to arrange.

Our most popular bracing is the Low Level Bracing Kit, this can be fixed back to the opposite wall at 90° or adjusted to 45° for fixing to the adjacent wall. We also have the Ceiling Brace Kit, and for a very different look the Floor to Ceiling Brace Kit, which fits over the leading edge of the shower screen, meaning you have no overhead "clutter" when showering or entering or exiting the enclosure.

Description	Max Size (mm)	Adjustment (mm)
Low Level Brace Kit*	1030	Cut to Suit
Ceiling Brace Kit	1030	Cut to Suit
Floor to Ceiling Brace Kit	2700 HIGH	Cut to Suit

*For use straight back to wall or can be cut to 45° if required for fixing to adjacent wall. N.B. Adjustments are measured from the wall to the inside of the glass.

Bracing Bar Colour Options | Our range of bracing bars can match the wall fixing finish of your choice.

Additional Options | Let your imagination go wild!

Tell us what you're looking for and we'll come up with a bespoke solution

- **Fluted Glass Shower Screens**

Fluted glass wetroom panels showcase a stylish decorative glass with a wide range of hardware colour options.

- **Enclosures**

Koster Aquatecnic can design shower enclosures to suit virtually any installation. We can supply 2 screen or 3 screen enclosures - with straight, curved and linear panels as well as a range of fixed or pivoting deflectors.

- **Sliding Doors**

Impressive range of sliding doors: featuring a silent and ultra-smooth running roller bearing system with a soft cushioned door closure.

- **Pivot Doors**

Our range of Pivot Doors help create a stunning and practical showering solution - taking up minimal external space when opened due to an offset opening.
